Please help me out! Saw this message in ur brother's profile, i'm really sorry to read about it. My friend has a solution for you. First, insert the CD of the game. Then open the disc drive. Right click on the game, click properties. Click the Open box. Then select "run as administrator" & ok. It will open as an administrator. Have you tried uninstalling the game and installing it again? Have you checked that you have the correct version of SilverStripe installed? n Your free (or trial) version of SilverStripe is not always the correct version for your game. Have you checked that you have no old SilverStripe caches on your PC? You can find the caches in the C:\Users\%USERNAME%\AppData\Local\Temp\ folder. Have you reinstalled the SilverStripe CMS? You can find the cms files in the root SilverStripe folder, and you can find the easiest way to do this is by using the SStool.exe that comes with the tool. See the documentation for details. Have you tried playing the game with a different browser? n There are known browser bugs in SilverStripe which can cause such problems. Have you installed any other games on your PC recently? n Those may have caused conflicts. Have you moved the game to a different folder? n If you haven't, this is the cause. Have you tried playing the game with different browsers? n Have you tried using an older version of SilverStripe to see if it resolves the issue? n Have you tried another browser? n Have you tried using a different computer? n Try running your game through the console (F12). Do you have any browser add-ons or extensions? n If you have, disable them. n Have you recently changed your PC's clock? n
