Q: Javascript math: If an int is greater than zero, minus it So I am making a paint roller simulator. I am trying to make a different noise for every roller color. I am storing the values in an array. so it looks like this 0-11, Green 12-21, Orange 22-31, Blue 32-43, Purple 44-53, Red 54-63, Yellow 64-75, Brown 76-86, Black I then start by saying that  $roll1\_color\_index$  (should be the index of the color) =  $roll1\_color\_index - roll2\_color\_index$ , and  $roll2\_color\_index = roll2\_color\_index + roll1\_color\_index$ . My math is giving me some issues. Like so  $roll1\_color\_index = roll1\_color\_index - roll2\_color\_index$   $roll1\_color\_index - roll2\_color\_index = (roll1\_color\_index - roll2\_color\_index) / 2$   $roll1\_color\_index - roll2\_color\_index / 2 = roll1\_color\_index$  Why does this not equal  $roll1\_color\_index = roll1\_color\_index + roll2\_color\_index / 2$  and  $roll2\_color\_index = roll2\_color\_index + roll1\_color\_index / 2$  My math is giving me an negative value when it's supposed to give me an integer. Roll1\_Color\_Index is a number, then that is what I am subtracting from, not the index. Then why are the numbers negative? A: Divide by 2 is integer division. Use //2 to do floating point division.  $roll1\_color\_index = roll1\_color\_index // 2$ ;  $roll2\_color\_index = roll2\_color\_index // 2$ ; Actually, your posted code is correct. I guess you're using the wrong variable names. Q: Why does Hibernate throw `com.mysql.jdbc.exceptions.jdbc4.MySQLSyntaxErrorException`? I have a class: `public class User implements Serializable { private static final long serialVersionUID = 1L; private static final Logger`
