Proteins possessing coenzyme B12-dependent dehydrogenases generally contain a B12-binding site which is functionally defined by a sequence of 10-20 amino acids that is known as the "B12-binding sequence" or "B12-box" (Metzger, B. J. (1980) Annu. Rev. Biochem. 49: 621-638). Coenzyme B12-dependent dehydrogenases are also called methylmalonyl coenzyme A mutase, alanine dehydrogenase, pyridoxine dehydrogenase, isopropylmalate dehydrogenase, alanine dehydrogenase, and pyruvate dehydrogenase.
