while enjoying regular sexual activity. In fact, there is actually an entire new field of medicine and science dealing specifically with male sexual health. The term, 'sexual medicine' is made up of a number of terms that cover all areas of male sexual health and function. Perhaps the most important of these is sexual dysfunction. In fact, sexual dysfunction is defined as the failure of any part of the reproductive system to function

properly. This can be due to physical, mental, emotional or social causes. What are the signs and symptoms of male sexual dysfunction? Among the most common problems are erectile dysfunction (ED), premature ejaculation, low sexual desire, erectile dysfunction in men over 60 years of age, abnormal ejaculation, and decreased libido. There are also many types of sexual dysfunction, including sexual dysfunction

due to the medical condition, relationship issues, physical problems, and emotional issues. Other common types of sexual dysfunction include: anxiety during sex, burning or increased sensitivity during sex, ejaculation disorders, lack of interest in sex, lack of desire for sex, mood disorders, pain during sex, premature ejaculation, and poor erections. A number of studies have shown that as many as 70% of males experience at

least one type of sexual dysfunction. While most problems can be corrected, there are cases where even with correction some men will continue to experience a problem. The objective of sexual medicine is to treat sexual problems rather than eliminate them. One of the best treatments for any type of sexual dysfunction is always the most natural route. In other words, for most men to have
