working-paper-dokter-dibuat-dom.pdf dokter-dibentuk A: What you are trying to do cannot be done using an XSLT instruction, because you have to select the elements before applying the instruction to them. The usual approach is to first load the entire XML into a document, perform whatever changes you need to, then call the transformations on the loaded document. See below an example: When you run that on the following example: The result is: Alternatively, if you do not want to use the full XSLT document transformation, you can use the normal (and easier) approach: When you run that on the following example: The result is:
