Calvino’s earlier novel describes the phases of his artistic discovery and his journey through the world of visual art. The second, written many years later, was dedicated to the memory of his mother, who died of cancer in 1981. As he explains in the dedication, “This book is a cry, a cry of love, for my mother, who was the most extraordinary model for a good life.”¹⁴ *La strada di San Giovanni* is Calvino’s first novel and his first literary success. It was first published in 1962 in Italy and then later in English in 1968, translated by Ann Goldstein and published by Putnam. At the time, his first novel had a “special, original merit,”¹⁵ but now, almost a half century later, it continues to resonate and to be read, particularly in Italy. The novel was widely discussed in Italy throughout the mid-1980s, and there are frequent references to it in cultural

51 there are no many ways to share the gorgeous aesthetics of *La strada di San Giovanni*. 22) oggi esistono solo piccole numeri in cui può giovare l'occhio. Studio Il mago di buon canto. . . . [Therapeutic effect of moxifloxacin on patients with urethritis, pyelonephritis and prostatitis]. We examined the therapeutic effect of moxifloxacin (MXF) on 40 patients with urethritis, pyelonephritis and prostatitis. The subjects comprised 27 men and 13 women with a mean age of 53.5 years (25-76 years). We administered MXF 400 mg once a day orally for 5 to 6 days. Urine specimens obtained before the administration were negative in all cases. The clinical effect was excellent in 18 patients (45%), good in 16 patients (40%), moderate in 5 patients (12.5%), fair in 1 patient (2.5%) and poor in 1 patient (2.5%). MXF was well tolerated. As for adverse reactions, the incidence of adverse reactions was 9.3% (4/43), and 2 patients complained of mild diarrhea, 1 of which was caused by concurrent administration of clarithromycin (CAM). The other adverse reactions were not observed. These results suggest that MXF is a useful drug for patients with various infections. It's Time For Us to Dump Some Dirty Secrets There are a lot of secrets in our society that needs to be exposed. One of the most prevalent lies within the Catholic Church, and it's one that most Catholics aren't aware of. The demonization and persecution of those who deny the belief that the Pope is God. This is the biggest secret in all of the Catholic Church. It's so big that Catholics that have a problem with these blatant lies (and it's a big problem, I can promise you that) say that they don't talk to Catholics that are anti-catholic about these things. Why? Because most Catholics who are anti-catholic have a secret that they won't talk about. Something that they won't tell a priest, pastor, friend, or neighbor about. I don't know if it's because they're ashamed, or because they don't 2d92ce491b
