Download Studio 6.4.0.1107 full cracked, free version, original. iPod, Bluetooth, Mobile phone, Games & Apps downloaders A: This may not be the fix, but you can download it from the same website, with a different name than the trial version, like: Free Studio 6.4.0.1107_Cracked.zip This is the version of the program that can be used with no limitations (as it comes as a cracked version). Q: How do I pass the object from one page to another in the new uiviewcontroller? I have a view controller which has a table and I have another view controller to add the data to the table. When I call the second view controller, I have to pass the object which I created in the first page but my method of passing them does not work. I want to pass them through the prepareForSegue method but I am having issues with that as well. My app is a View based application and the segue is push segue. [self performSegueWithIdentifier:@"mySegueID" sender:self]; prepare for segue is as follows: - (void)prepareForSegue:(UIStoryboardSegue *)segue sender:(id)sender { if ([segue.identifier isEqualToString:@"mySegueID"]) { // Create a new view controller using the segue's // identifier. SecondViewController *controller = (SecondViewController*) segue.destinationViewController; controller.controllerArray = self.controllerArray; } } A: Make sure you have assigned an id to your VC (id = @"yourid" in storyboard, make sure it's a correct view controller) then implement your Segue like this: - (void)prepareForSegue:(UIStoryboardSegue *)segue sender:(id)sender { if ([segue.identifier isEqualToString:@"yourid"]) {
