They have a web page at www.ross-tech.com where you can download free software that can also be purchased. (Though, it seems you've already purchased the version you're running.) Clinician perception of the utility of symptom-related pre-visit electronic screening tools. Routine symptom screening is recommended by many disease-specific guidelines, yet its utility has not been validated. We assessed the utility of 3 symptom-related electronic pre-visit screening tools: the Checklist of Symptoms in Elderly Patients (CLOSEP), American Geriatrics Society Beers Criteria (AGS Beers), and the EPIC-PC algorithm (Epic Systems Corporation). Among primary care clinicians at the Veterans Affairs Puget Sound Health Care System, Washington, 954 prescriptions were prescribed for 1,105 patients and one of the three symptom-based electronic screening tools was used to screen for 897 of these. For each electronic screening tool, the screening scores were converted into a ranking, from 0 to 3, based on the utilities reported in published articles. Clinicians agreed on the utility of 2 of 3 screening tools, with a moderate concordance ($\kappa=0.44$) and fair agreement ($\kappa=0.27$) for the EPIC-PC and AGS Beers. Only EPIC-PC had a significant difference in rankings between the discordant clinicians (pQ: How can I make a video iframe fullscreen and the video play while the user scrolls? I have an issue when I want to fullscreen a video while scrolling on the page, the video don't want to play but just view. And here is the site. A: the video is working properly, but it is shown off screen. Make sure that the video size is bigger than the browser, then it should work!
