Photoshop is a complex program, there is no reason to learn the basics of it here. To get started, we recommend looking at the official Adobe Photoshop tutorials as well as these Photoshop tutorial videos. On top of editing photos, graphic designers can use Photoshop to create highly professional graphics for websites and print media. Mentioned Photoshop Filters in this article: 3D effects and Lighting Artistic Filters Blur, Glow, Gradient and Text Brightness/Contrast & Levels Colors, Curves, Black & White Effects & Adjustments 3D & Object Make Appearances & Transform Photoshop Actions and Presets Shading/Masking The majority of graphics and web design are based on vector graphics. Vector graphics are the most common, especially for print and web, as they can scale to any size without loss of quality. An image or graphic is comprised of several different shapes and objects, which are then grouped together by using simple tools such as squares, circles and rectangles. You create vector graphics by drawing lines that create a shape. Photoshop layers allow you to keep different objects separate and you can "arrange them on top of one another to form a new layer of work." What you draw is called a vector image or graphics. Vector images aren't stored in the computer like bitmap images and you can easily resize and scale them without any loss in quality. Vector graphics are inherently more flexible than bitmap graphics because you can scale them infinitely with no loss of quality or loss of information. Vector images are also called objects. Objects are the shapes and text that you create. With Photoshop and other graphic editors, you can draw images from scratch, make complex shapes using intricate designs, or draw simple shapes such as rectangles, circles, ellipses and more. You can then use these objects to make other images, such as a photo, newsletter cover or web banner. Creating a vector image To make a vector image you need to draw your shapes first. Let's take a look at an example. Grab the Ellipse Tool from the Tools bar and drag the white handle into the photo and release. There are two ways to create a new layer. To create a new layer you can click on New Layer on top of the layer you want to create a new layer on. Or you can use a681f4349e

To use it, you must first select an area on the image that you want to copy. To do this, just click in an image area. [Illustration: Click in an image area to select the area you want to copy.] After you have selected the area you want to copy, you must click on the Canvas option at the top of the Toolbox to make a preview in a new document appear. Then click and drag the highlight area, which will copy the pixels into the new document. Note: The Clone Stamp tool copies whatever is highlighted within the copy area and the copy is created in the context of the original canvas. The copied pixels are pasted on top of the canvas where you have clicked. Now you can paste in a new location, for example, you want to use the original area for something else. To do this, you must move the cursor down and right to a new position on the canvas and then click the paste function. [Illustration: Click and drag an area of the canvas to move the image over.] The Tools ⇒ Pen tool The Pen tool allows you to draw lines, arrows, and freehand curves on an image. You can draw any type of line, be it a straight line, curved line, an arc, a circle, an ellipse, or a combination of them. You can also draw freehand curves. [Illustration: To draw a line with the Pen tool, you must select an area of the canvas to draw the line on. Then you can move the cursor around to adjust the line.] [Illustration: The following figure explains what happens when you click and drag the cursor. The image is moved to the position of the cursor. If you press and hold the left mouse button down, you can use the Pen tool to draw a freehand curve. As you drag, a line follows from the starting point to the end of the line. When you release the mouse, the line is completed and created. If you want to erase a line, you must delete it

Mosque splits nationalists from Central Asia Kazakhstan's largest Islamic society, the Imam Shamil Quran and Culture Society has played a key role in the defense of sovereignty in the country since the collapse of the Soviet Union. The religious group supports the U.S. position in Afghanistan. It is a member of the Eurasian Islamic movement which also includes the Union of Uzbeks, the Turkestan Islamic Party, and other groups which seek to make Central Asia an independent Islamic state. The U.S. supports the Pan-Turkist idea. The Southern Turkestan Union is often associated with this goal. The Imam Shamil Quran and Culture Society (ISQC), with 15,000 members, has been largely the voice of the Afghan and Central Asian Muslims. It has published several thousand books and magazines and holds cultural and youth festivals. It has opposed the Russian-Uzbek-led independence movement and thus, the Muslim government of Kazakhstan's participation in the new ruble-based "Common Economic Space" group of Central Asian countries. ISQC leaders say the Imam Shamil Quran and Culture Society is fighting for its Islamic identity and sovereignty. "We are defending the rights of the people to freedom of thought and expression," says Sayida Ildaeva, the deputy chairman of the society. She heads a delegation of the society to the British Council of ISQC branches, which is organising a congress in Central Asia this week. Members of the delegation said the ISQC was being closely monitored by the secular bureaucracy and security services. The Imam Shamil Quran and Culture Society is part of the Eurasian Islamic movement. The movement's founder, Ali Sharipov, and his followers have long been condemned for propagating violence. Sharipov died in Moscow in 2001. The society has survived a series of terrorist attacks – two car bombs in central Kazakhstan in 1992, a bombing in the city of Dushanbe in 1995. A man was arrested for suspicious activity at a square near the house of the leader of the Islamic Movement. "We have not received any threats," says Nurlan Musashvili, head of the Imam Shamil Society. "They come after what we say. We are against anti-Islamic activity," he says. The situation began to change after the collapse of
