What is cool about the app? Watch Now has everything, from movies, to television shows, to series and series, it has it all. It provides you with a vast catalog of movies and series to choose from, and it does so very quickly. It features something that seems lacking on most apps, such as the ability to cast a video on a TV or mobile device, which allows you to enjoy the video without the need to actually watch it on the TV screen. It allows you to pause the video when you are switching between tabs or minimizing it to the taskbar, which can save you time, especially if you are in the middle of a game and need to pause or pick up where you left off. Another good thing about Watch Now is that it allows you to cast videos from the app onto your TV or mobile device, whether it is a smart TV, or smart phone/tablet/Xbox/Apple TV, or any other device supported by Android. But what is bad? There is no timeline
