oShare is a lightweight DLNA compliant media server whose purpose is to help you stream digital media files, such as songs, photos and videos, on other devices. Portable running mode

Portability comes with several benefits to your system. You can run the utility directly on your PC without having to go through an installation process and open it without administrative privileges. It does not entries in your Windows registry so a simple deletion task is sufficient for getting rid of it. Optionally, you may copy it on portable devices and carry it with you all the time. Clean looks The

GUI looks intuitive and embeds only a few configuration settings. There's no support for a help manual but the dedicated parameters look easy to work with, so you are not going to spend a lot of time setting up the entire process. Configuration settings oShare gives you the possibility to build up a list with the folders that you want to share. Directories can be added in the working environment using the built-in browse button (you cannot rely on the drag-and-drop support). What's more, you can remove directories from the list if you no longer need them, set up a media server name, as well as automatically activate the sharing task at login. It also supports MKV video streaming over DLNA.

Bottom line The final verdict is that oShare provides nothing more than a simplistic software solution for helping you share digital media files with compatible devices. It is not as featured-rich as other media servers but it gets the job done quickly and without having to go through lengthy and difficult configuration settings. The straightforward design makes it suitable for beginners and professionals alike. With oShare you can stream/transmit music, photos, movies and games with DLNA compatibility, via NAS devices or via USB. It's lightweight, secure and can be used on your PC, NAS, iPod, iOS device or the Raspberry Pi. oShare is part of the KDE Applications collection and is

open source software available under the terms of the GNU General Public License (GPL) Version 2. Like it? Share with your friends! Other Windows Software of Developer «DVD-Recorder»: A software to burn video to DVD discs. The program supports burning discs from digital video sources like QT, WMV, AVI, MPG, MP4, RM, 3GP, XVID, etc. A software to burn video to DVD discs. The program supports burning discs from

Free Download: oShareSlim, Straight and Athletic: Chicago architect; amazing swimmer, talent scout and planner of the city he loved. By Maris Stella Chicago-born and bred Harry Weese had a passion for architecture and swimming. He was also the Chicago plan commission's chief of staff, a talent scout, and an

enthusiast for the city's renaissance. The young architect planned the city's first swimming pool for the city of Chicago in the 1910s. His plans, and those of other architects at the time, were conceived with the motto, "Architecture should be adapted to its setting, but not vice versa." But while his work at the commission won him accolades, it was Weese's love for swimming that would ultimately guide him. Weese was a successful swimmer for the University of Michigan and the U.S. Olympic Team from 1911 to 1915. Weese was a swimmer at the university's annual training camp where he would often swim up the Chicago River to Lake Michigan in the summer. Weese's skills as a swimmer got him

hired as Chicago
