The advantage of using this program is that you don't need to create a username and password for each client. Authentic Remote Description: Authentic Remote is a program that allows you to authenticate Windows clients remotely. The program is easy to use and you can select the programs you want to start after login. 0 Free to try Contact Manager - OTRS Control is an application that has been created with the aim of managing the configuration files of OTRS and Redmine. It helps administrators to configure OTRS and Redmine without direct access to the files (e.g. OTRS templates and Redmine plugins). It works with Redmine installation that uses OTRS templates. You need to choose the installation type in the package installer and choose between OTRS or Redmine installation. For OTRS, you can choose the installed templates and configure the settings for each template. In order to do this, you need to create the specific parameters for each template using the "Create Parameter" button. In addition to this, you can create the template version to keep the same settings, but with a different code. For Redmine, you can choose the installed plugins and configure the settings for each plugin using the "Create Parameter" button. The application supports logging and debugging using the optional JKLogger component. Contact Manager - OTRS Control License: This program is free for you to use for 30 days 0 Free to try Developer Community - Software downloads related to Developer Community Archive utilities - ArchiveMe 2.1 ArchiveMe is a free, easy-to-use archiving utility that copies files and directories to make a backup or migrate a site. It's similar to similar Windows utilities, but it's designed specifically for
