
Neverhood Windows 7 Patch Download

I noticed a lot of people saying that this game needs a patch to run with the correct palette on Windows 7, but it doesn't. Just go to [nhc.exe's co. uk/nhl/nhl/nhl.exe](http://nhc.exe.co.uk/nhl/nhl/nhl.exe) and select "Start Client" under Options. This will allow you to see colors on your monitor that are different from those shown by Windows or the monitor's screen when it starts up. Just select "Settings". If you want to play against your own computer program, then simply launch the game, then click "Settings" and select "Computer Program". Then click on the "Custom Support" button at the bottom of the screen and then click on "Settings".
