SoundFonts are collections of digital samples of recorded sounds that are used in sound-generation software such as samplers, sound editors, and synthesizers. For the past three months, we've been systematically importing registered SoundFonts from our library, including V-Drums V12, to our SoundFonts database. This latest update adds more than 200 new SoundFonts to the database, plus tons of missing SoundFonts have been added. Now you can dive into and create MIDI sound libraries using the world's best sound-creation software! SoundFont Gen v3.0 includes the following additions: V-Drums V12 is now available for SoundFont Gen v3.0. It can be used in SoundFont, Sp-12, Sp-25, and Kontakt formats. This new V-Drums sample set includes over 28 hours of material for drum kits, one of the most difficult drum samples to record. Learn more about V-Drums V12 here. Now you can
