What's New In?

DigitalPersona Fingerprint Reader Software is an application that allows you to access your computer with your fingerprint. It has a main purpose of securing your data, but can also be used for other purposes. The program provides an additional layer of security to your computer and private data. So, it prevents hackers from obtaining information by misusing your fingerprint or your login information. Besides, it uses a password that you have set previously. Thus, the chance of losing access to your PC is minimized. Facing obstacles In order to use the fingerprint authentication, your operating system must have support for it. In order to be able to use the program, you need to install the developer's toolkit. Although the system requirements are minimal, your computer must have a fingerprint reader to be able to use the software. If you have a laptop with a built-in reader, you can use it. Otherwise, you can use a USB device. Enroll fingerprints The setup program prompts you to complete the 'Getting Started' wizard. It guides you through all the steps that you need to take to set up your fingerprint reader and your account information. After you complete it successfully, you can use the software. Access any account with your fingerprint The main purpose of the software is to strengthen PC security by using fingerprint authentication. Thus, it enables you to enroll fingerprints and provides a reliable communication method between the computer and the hardware reader device. Various customizable settings When you open it for the first time, you can use the 'Security Check' tab to overview the overall security status and verify the password strength for every one of your monitored websites and accounts. In addition, you can use shortcut keys to quickly access different websites. Moreover, the program comes with a password manager that can protect access to websites and programs. Here, you can add multiple online accounts (website logon screens) that you can later access using your fingerprint. The 'Manage' tab enables you to edit or remove user names and passwords, organize them in categories and import or export online accounts. Why it is worth using:

- Secure access to your PC
- Login to websites with your fingerprint
- Fast access to web pages and programs
- Protect against identity theft
- Import or export online accounts
