
Please Download Gta Vice City Game Free __EXCLUSIVE__

GTA V Grand Theft Auto Vice City for android - Jailbreak - Link - XCP thingy - etc.!!! - You've been 10 years in the making, if you were going to make your sequel to the king, you'd know you should do an overhaul on some things. - Also you should have included the ability to transport and supply other vehicles to the player in the beginning, and not hold it for later as some new features - The PS3 could've worked as the NEXT gen console - The QTEs that come up with the gameplay don't do that much effect. - I think you should have implemented something on the character with character sheet to make it look like it's a next gen game. - The optional things- the option to join a gang or even be able to get the thugs tools- that should be implemented ASAP. - Game should be harder - Blood, it's more like a movie of like 300 or 400 BC, I'm serious.!!! - The game should be about like!!! - Bringing in the wroshyrone with the trampoline- that's a great idea. - Murder Don't sleep - Can you bring in the mythical airboat at anytime, like during the daytime? - Instead of waking up the next, the sleeping party should wake up, like better.!!! - You'd get more money with the life insurance I think. - The guys should be able to have more police actions. - The cops should not be too skinny.!!! - The cops should make more fun stuff. - What you have to do to save the girl, save himself because I'm not a murderer.!!! - You have to put in more features on the car, cause it's a car game.!!! - You have to put!!! - If the cops do arrest you, you don't kill your friend, you should save him.!!! - You could replace health items and protect health from the other party, but not what he did. - When you are stabbed, they could be more fun and interesting, but not sometimes getting up for 3 minutes in a bullet and going to a door to see if they're dead.!!! - Switch it around, more with cause the jobs.!!! - If you can shoot guns, you can shoot bullets, not just use the camera.
