Kastor – Free Audio Extractor is a software tool whose sole purpose is to aid you in converting video files to audio tracks, with just a few clicks, as well as listen to them. Well-structured environment The installation process is a piece of cake, as it does not bring any kind of surprises and it is over in a jiffy. The interface might seem a bit overwhelming at first, yet it is very well organized, enclosing a menu bar, several buttons, a pane where to view uploaded items and another one which displays the waveform. It is suitable to all types of users, including those with little or no previous experience with computers. Extensions supported This software

program supports a pretty large number of file types at import, such as AVI, FLV, MP4, MOV, AAC, M4A, MP3, AC3, ASF, WMV and WAV, while export is only available in MP3, WAV, OGG, FLAC and WMA formats. All of these can be uploaded with the help of an incorporated file browser, as well as the “drag and drop” function. Plenty parameters to configure It is possible to play all added files with the help of the built-in playback buttons, while you can also choose the start and end time, thus trimming the length of the item. Aside from that, you can also tweak a pretty wide range of parameters, depending on the output extension. To be more precise, when it comes to MP3 files, you can adjust the bit rate, channel and tag it as copyright, original and private, while WMAs enable you to change frequency,

channels and nominal bit rate. FLAC items can only have different levels of quality (8 being the best), and OGG files support tweaks at frequency, channels, bit rate, and quality. Bottom line To conclude, Kastor – Free Audio Extractor is a pretty efficient and reliable piece of software when it comes to converting videos to songs. The interface is user-friendly, resource requirements are minimal, all tasks are performed in due time and there are sufficient options to keep you busy for quite a while. Kastor – Free Audio Extractor is a software tool whose sole purpose is to aid you in converting video files to audio tracks, with just a few clicks, as well as listen to them. User reviews of Kastor - Free Audio Extractor Good program I did not have any problems with it, it was easy to install and use. Also very easy to use, I was able to change the settings I wanted. Cons: It was not able to extract the audio from the video file with the first two samples. I had to go to the next sample to get them to work. I did not have any problems with it, it was easy to install and use. Also very easy to use, I was able to change the settings I wanted. great software im not a pro so it took me a while to get it to do what i wanted but it

did finally work just fine. i have been using it for a few years now and it still works just fine. if you do not know much about computers and video editing i recommend you to not use this program but for someone like me it works well, just keep in mind that this program is not free and i do not recommend you to try it unless you know it is free of charge.

Pros: it works great and easy to use. Cons: it takes some time to figure out. Great program I've used it a lot and it does everything I want it to do. I can convert from video to audio, cut parts of the audio, add music, change all sorts of things. It's great. I don't know how it compares to other audio convertors but it's free and it works very well. Pros: Very easy to use, I can tell it understands the format. The time frame options are very useful and I like

that I can trim to the start and end of the video. It's nice that it allows me to add in a song while converting to video. It's very easy to use. Cons: It's not 100% free, there's a small watermark on the first screen, but it's very small. I have it installed on a Mac, but I could also imagine using it on Windows. I have never had any problems using this program. It works very well. Free Software! I needed a tool to be able to transfer audio from my PS3 videos for my laptop. I am happy to say this software is FAST and well made. Plus, it's FREE! So, I would definitely recommend this to anyone looking for a similar tool. Plus, it really does convert audio for video at a fast rate. You may have seen Teller Tranter in major cities and on popular TV shows, from Friends to Shonda Rhimes. But the service has a much more

humble purpose
