It will encourage other users to download the software and helps us to maintain its development. All of the issues discussed above, and others not discussed, can be produced by the interplay of three factors: the number of slaves, the distribution of the slaves among the slaves, and the number of masters. Example Let's consider a simple example with three slaves. Let slave0 and slave1 be separate hosts on the

What's New in the Animated Weather?

Animated Weather is a lightweight software application whose purpose is to help you view the weather conditions for a user-defined location. The program sports a clean and intuitive layout that offers only a few configuration settings to tinker with. The tool runs quietly in the system tray until called upon when it reveals realistic video effects of cloudiness, rain, and snow. The program offers support for an animated weather forecast for the next six days and different time periods for the current day, such as morning, noon, evening, and night. Other notable characteristics worth mentioning are represented by the possibility to search for the desired location by typing in the first letters, full name, or ZIP code, and select the weather provider from a drop-down list. When it comes to configuration settings, you are allowed to choose between different video effects, add a background image by uploading a photo from your computer, set the blurring level, as well alter the shade. Since it doesn't require much computer knowledge to work with this tool, even rookies can set up the weather parameters with minimum effort. During our testing we have noticed that Animated Weather carries out a task quickly, provides very good image quality, and no errors showed up throughout the entire process. It leaves a minimal footprint on system resources, so the overall performance

of the computer is not affected. All in all, Animated Weather seems to be the right choice in case you are looking for a simple-to-use weather forecast application that comes bundled with basic features. Thanks to its overall simplicity, it can be used by beginners and professionals alike. Advertisement Showplayer 1.9.1 - Professional Video Player Pro Showplayer is an intuitive, full-featured program that gives you a quick and user-friendly way of viewing your videos. A simple drag and drop interface allows you to quickly view your media collection and create playlists. Apart from that, you can choose to play the videos in Full Screen or as a window. You can also trim videos to the exact length you want them to be. A slideshow feature allows you to create automatic playlists, and you can synchronize multiple Slideshows with each other. There's a powerful "Fix" and "Rotate" tools that allow you to correct the orientation, brightness, and contrast of your video. Besides that, you get a comprehensive set of advanced video features such as an option to select the audio track, 3D
