lakatosleventeaktuspdfreeQ: How to use the modulo operator for this situation What i am trying to do is: Write a function that accepts three arguments. The first argument is the maximum value for k. The second argument is the number of times you are going to divide. The third argument is the number of times you want to print a number on the screen. This will only print till the first value of the number falls below the number of times you want to print. EX: 2, 3, 3 times function mydivide(k,n,r) { var num = 0; for(var i = 0; i Redwood City, CA— August 18, 2012—Zynga Inc. (Nasdaq: ZNGA) today announced that its Board of Directors approved changes to the Company's stock option plan. Effective with the Company's Third Quarter 2012 Stock Option Exercise date, October 1, 2012, the minimum number of shares of Common Stock issuable upon exercise of stock options granted pursuant to the Company's 2008 Stock Incentive Plan will be increased by 55.2% to reflect an equity-based employee compensation allocation of 10.99%. This increase will not affect the exercise price of any existing unexercised options or the current date of vesting of all options. The share increase will be reflected in the quarterly compensation expense reserves, which has a direct impact on the Company's financial results and operating expenses. To offset the additional expense, the Company has reduced the
